PROJECT SHOWCASE

I replaced my uncle's paper billpad with software.

KusBill: a billing and ledger app for small Nepali shops. Built end to end and running in production.

OPENING BALANCE	TOTAL DEBIT	TOTAL CREDIT	CLOSING BALANCE
Rs. 45,000.00	Rs. 711,200.00	Rs. 102,650.00	Rs. 653,550.00
			24 entries in period

Tip: double-click (or press Enter on) a cell to edit it. Enter saves, Esc cancels, arrow keys move. Columns

DATE ↑	BILL NO. ⇅	DESCRIPTION	DEBIT ⇅	CREDIT ⇅	BALANCE ⇅	
2083-06-3C	R82608	Description (	Debit	Credit	new	+ Add
2083-04-03	101	Rice 50 kg x 10 - Ram Stores Sales by Kushal	18,500.00		63,500.00	Open Delete
2083-04-03	102	Cooking oil purchase Purchases by Kushal		6,200.00	57,300.00	Open Delete
2083-04-07	103	Sugar and tea - Hari Kirana Sales by Kushal	9,400.00		66,700.00	Open Delete
2083-04-12	104	Shop rent - Shrawan Rent by Kushal		15,000.00	51,700.00	Open Delete
2083-04-15	105	Wholesale order - Sita Traders Sales by Kushal	22,750.00		74,450.00	Open Delete
2083-04-20	106	Stock purchase - spices Purchases		8,800.00	65,650.00	Open Delete

THE PROBLEM

A paper pad is fast, until it isn't.

DATE	BILL NO.	DEBIT	CREDIT	BALANCE
12 Kartik	101	18,500		63,500
12 Kartik	102		6,200	57,300
15 Kartik	103	9,400		~~66,600~~
16 Kartik	104		15,000	~~51,700~~

wrong from here on

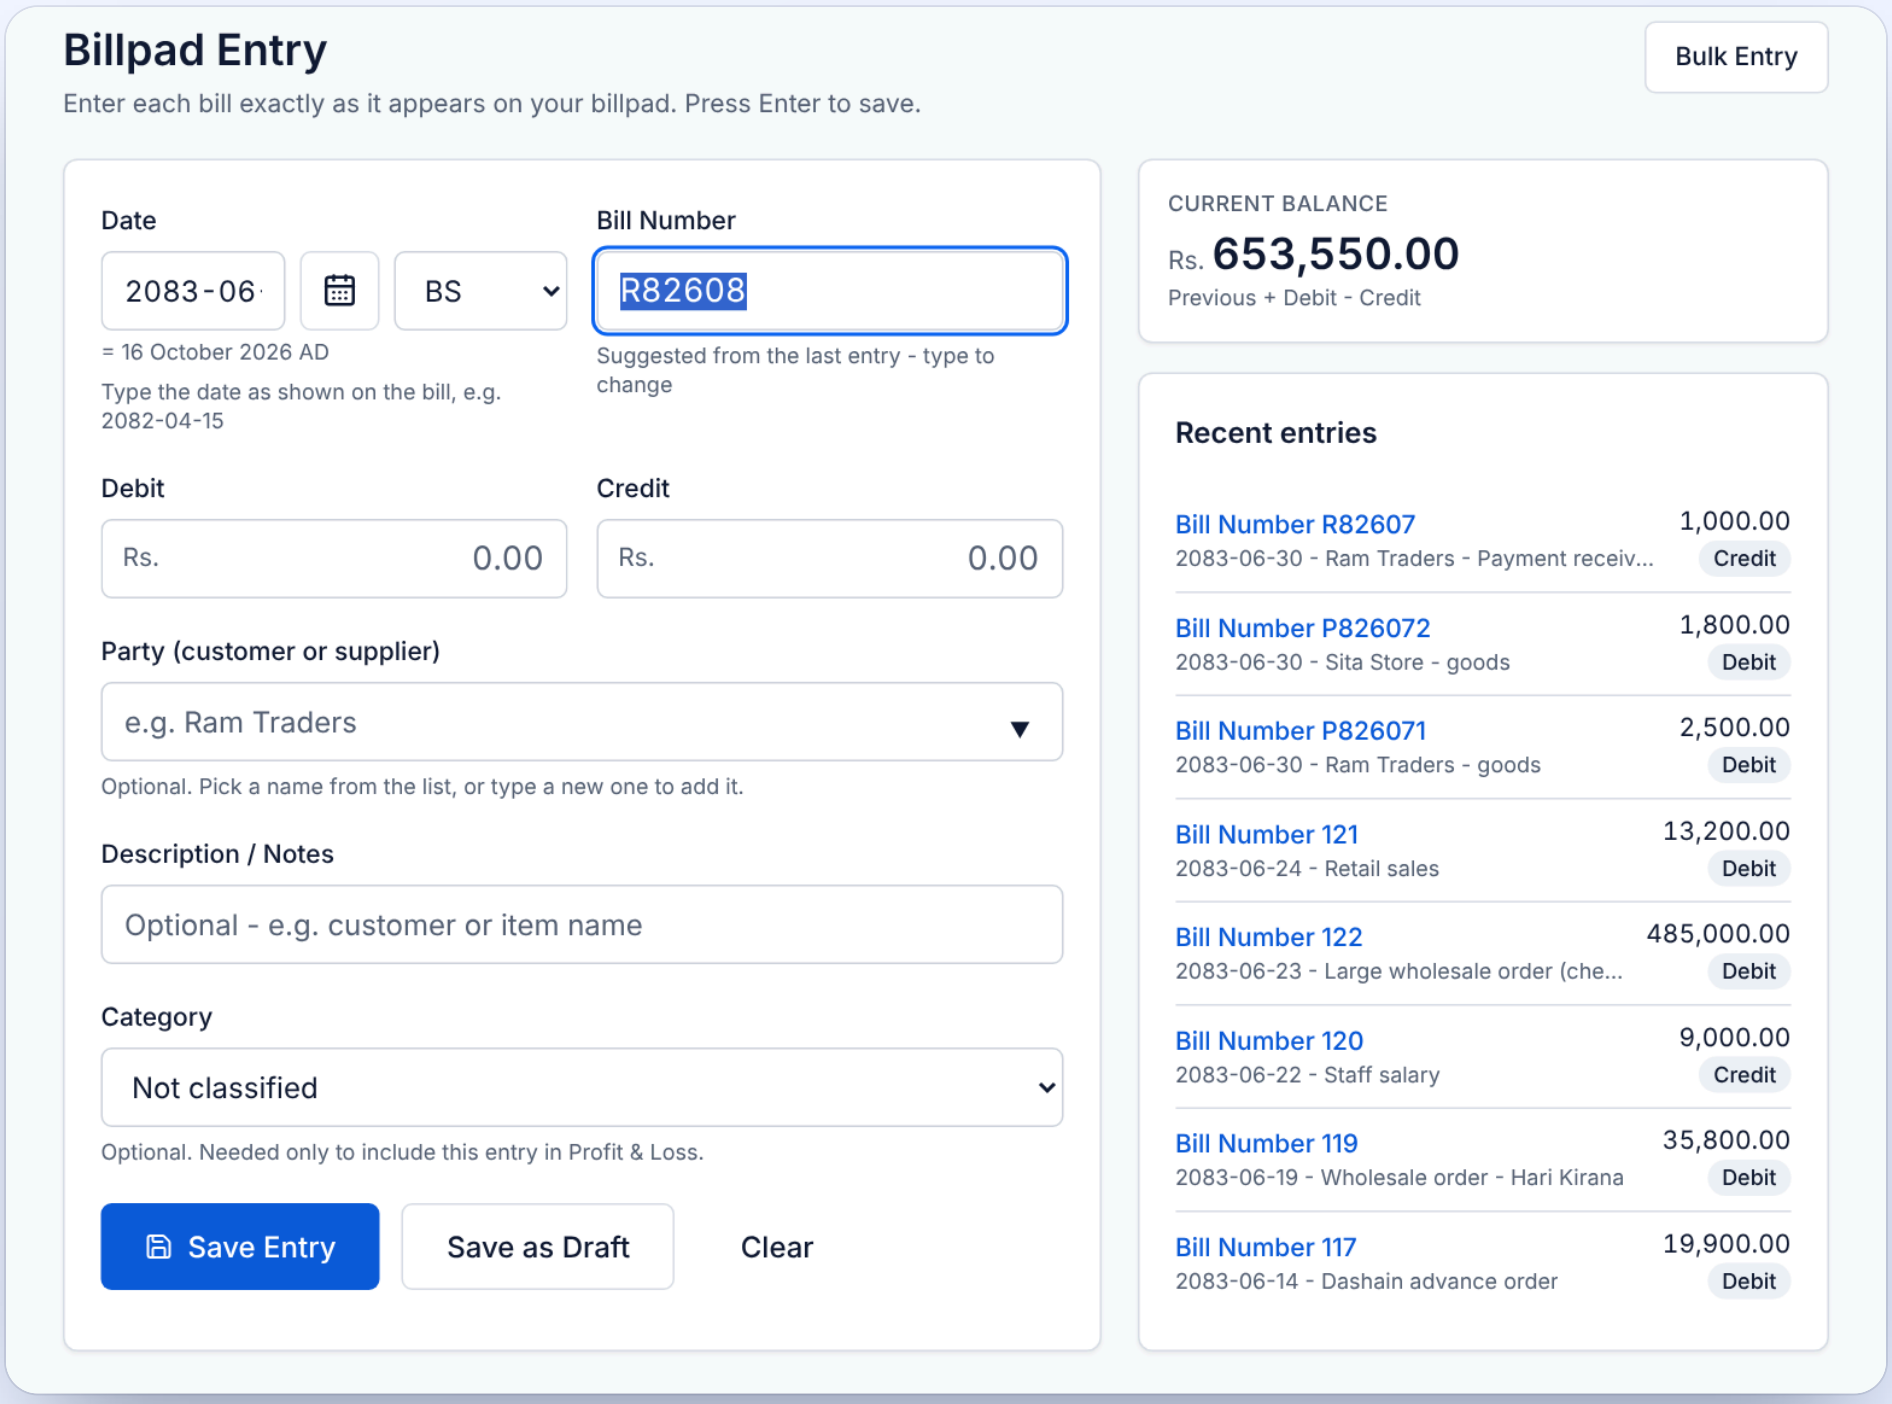

- One slip in addition and every balance after it is wrong.
- A lost or wet page is lost money.
- Nobody can quickly say who still owes what.

> **So I built KusBill: the same pad, with a calculator that never makes mistakes.**

FAMILIAR ON PURPOSE

Type it exactly like the pad.

- Same fields: date, bill number, debit, credit.
- Nepali (BS) or English (AD) dates, with a calendar picker.
- Warns before you save a duplicate bill number.

NUMBERS YOU CAN TRUST

A running balance that can't drift.

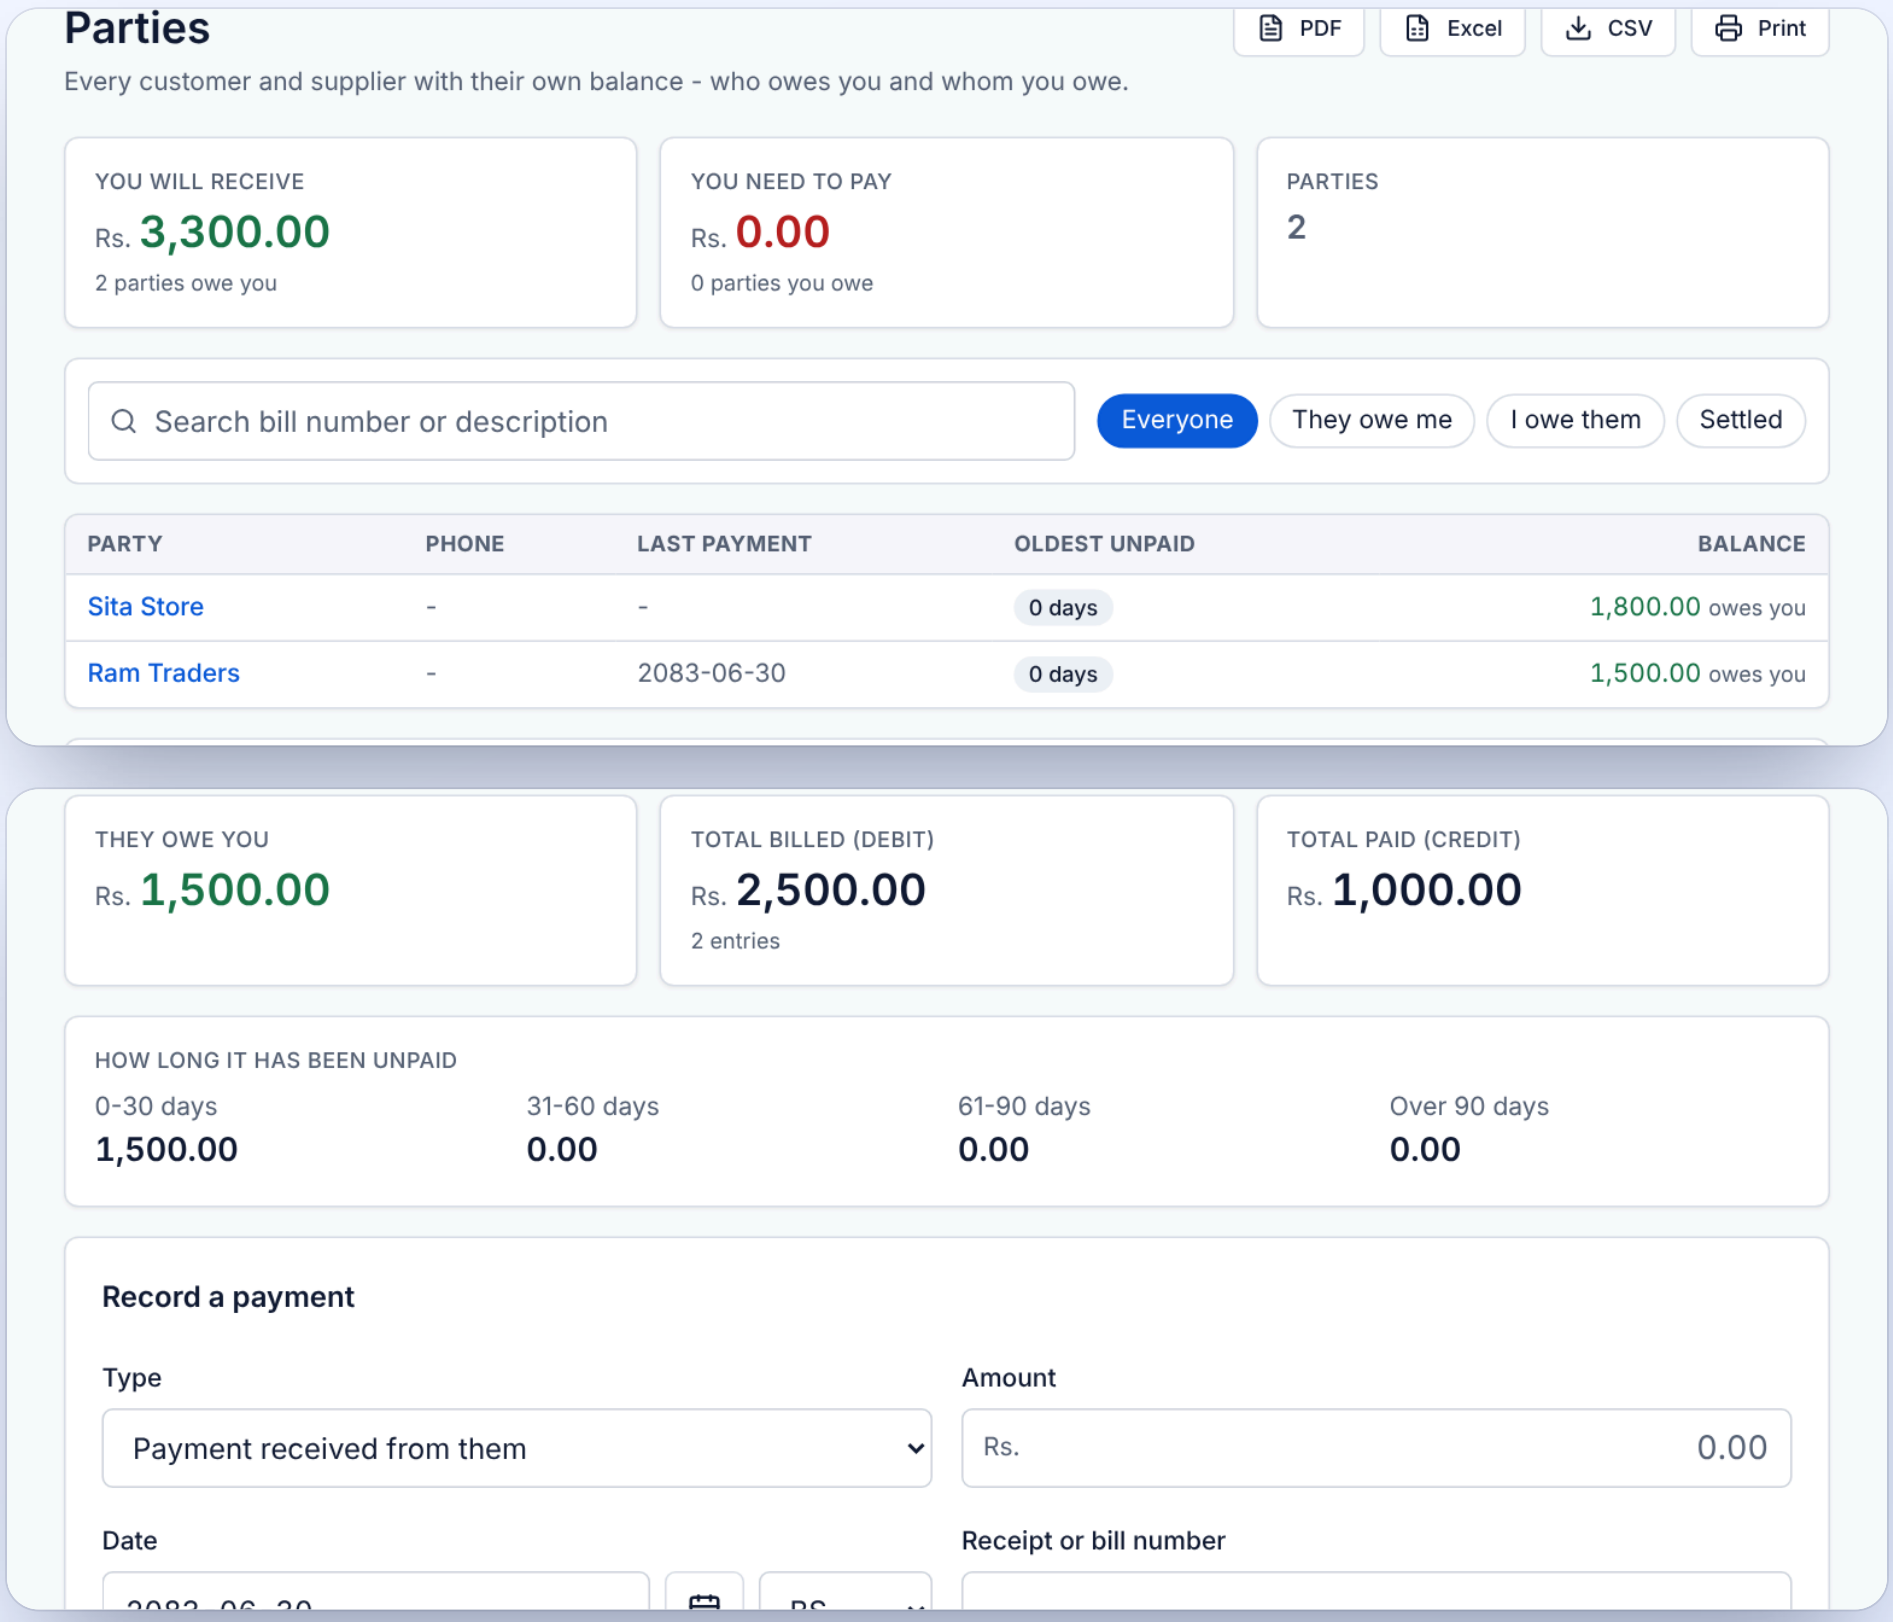

- Balances are calculated from the full history, never stored.
- Fix or insert an old entry and every later balance updates.
- Edit straight in the table. Every change is in the audit log.

NEW: PARTIES

Who owes you? One screen.

- Every customer and supplier gets their own ledger.
- Unpaid bills are aged: 30, 60, 90 days and over.
- Record a payment in one step. Share or print a statement.

REPORTS

Print it like the pad. Export it like a pro.

- Billpad-style pages with brought-forward and carried-forward totals.
- PDF, Excel and CSV. Daily, monthly and annual reports.
- Profit and loss and trial balance from balanced journals.

Kus Traders

New Road, Kathmandu | 01-4xxxxxx | kustraders@example.com | PAN 123456789

Billpad-style Statement

1900-01-01 to 2999-12-31 BS (1900-01-01 to 2999-12-31 AD)

Opening Balance	45,000.00	Total Debit	711,200.00	Total Credit	102,650.00
Closing Balance	653,550.00	Entries	24	Balance rule	Balance = Previous Balance + Debit - Credit

BUILT FOR THE REAL SHOP

Nepali. On a phone. Even offline.

- One tap switches the whole app to Nepali, including PDFs.
- Internet drops? Entries are saved encrypted on the device and sync later.

UNDER THE HOOD

Boring on purpose, where money is involved.

Next.js 15 · TypeScript · PostgreSQL · Prisma · Zod · Tailwind · Playwright

148
automated tests against a real database

0
stored balances to go out of sync

2
calendars: Bikram Sambat and Gregorian

3
roles: owner, accountant, viewer

- Row-level locking so two people can't corrupt the ledger.
- Audit log, backups, email verification, password reset.

WHAT I LEARNED

The hard part isn't the code.

> **Start from the real paper process. People adopt software that feels like what they already do.**

> **Make wrong states impossible, not just unlikely: derive balances, lock writes, test with a real database.**

> **Ship to real users early. Their first question ("who owes me?") became the next feature.**

Built for my uncle's shop. Happy to share how it works.
